Declaration

The undersigned hereby declares that, to the best of its knowledge and based on information obtained from raw material suppliers, additive suppliers, adhesive suppliers, ink suppliers, coating suppliers, and any other relevant upstream sources, per- and polyfluoroalkyl substances (PFAS) have not been intentionally added to the formulation, manufacture, finishing, coating, treatment, or converting process of the product identified above.
This declaration concerns non-intentional addition of PFAS and is provided as documentary evidence for supply-chain due diligence. It does not by itself constitute analytical proof of PFAS absence, nor does it replace testing, technical documentation, or any regulatory assessment required under applicable law.
This declaration is based on information reasonably available from the supply chain at the date of issue and confirms absence of intentional use or intentional addition, but does not by itself guarantee absence of trace contamination, adventitious presence, or analytically detectable residual fluorinated substances; shall be reviewed if there is any change in composition, process, supplier, intended use, legal requirements, or relevant compliance information.
