

PPWR Declaration – Regulation EU 2025/40

Date 5 August 2026

Declaration of Conformity

We hereby declare that the tapes and labels we manufacture are produced with consideration of the requirements of Regulation (EU) 2025/40 (PPWR), including requirements related to reducing the environmental impact of packaging and the release of plastic microparticles.

Based on our suppliers' declarations and our current knowledge, the raw materials used do not contain intentionally added synthetic polymer microparticles. PFAS substances, including PFOA and PFOS, are not intentionally added to our products.

We are a manufacturer of adhesive tapes and labels, not a chemical producer. Our assessment of chemical compliance is therefore based on supplier declarations and our own production processes.

Regarding REACH Regulation (EC) No. 1907/2006, we are not producers of substances and therefore have no obligation to register our products as substances. Regarding SVHC, none of our suppliers has informed us that the materials supplied to us contain substances listed on the SVHC Candidate List updated on 4 February 2026. We will inform our customers if this status changes.

Our products comply with the applicable requirements of RoHS Directive 2011/65/EU, with restricted substances either absent or within permitted limits.

Finally, our products do not contain tin (Sn), tantalum (Ta), tungsten (W), or gold (Au) originating from conflict-affected or high-risk areas, based on supplier information and our internal supply chain assessments.
